Re: Oakwood Avenue Project
Date: August 26, 2019

The Oakwood Avenue Project is getting underway. The project spans all of Oakwood, excluding the section between Olean Street and Elmwood Avenue.

Work includes replacing the waterline, making drainage improvements and full reconstruction of the road, including replacement of the curbs and sidewalks.

The project is broken into two phases, part done this year and part next year. Only four trees are planned to be removed, near the intersection of Hamburg Street.

Oakwood Avenue will be open to **Local Traffic Only** during construction, **beginning September 3rd** through at least December 20th for the part of the project done this year.

For all other traffic (non-local) **Oakwood Avenue will be closed from Olean Street to Walnut Street** with detours clearly marked. Local residents and property owners, however, will continue to have access to their driveways and properties.

Other notices of construction activities impacting residents and property owners shall be provided, as needed. Notices and updates will also be posted on the Village website at www.East-Aurora.ny.us.

Persons with comments or questions should call the Department of Public Works at 652-6057 or Village Administration at 652-6000x220.
