

Oakwood Project Update – March 20, 2020

Project work will continue along Oakwood Avenue on Monday, March 23rd on the blocks between Walnut Street and Park Place as follows:

The Contractor will continue waterline installation along the south curb line between Walnut Street and Park Place. On or about Wednesday, March 25th, the excavation will cross South Grove Street and proceed toward Park Place. The work is expected to impact access to driveways on both sides of the street while digging near each driveway. All driveways are expected to be open by the end of the workday.

For properties on the south side of the street, we are anticipating that there may be minor conflicts with the water services on that side of the street. If necessary, the Contractor may need to shut off some water services for a short period of time when directly in front of each house. This is expected to impact residences ON THE SOUTH SIDE OF THE STREET ONLY. Further updates will be provided if necessary via text or email.

The Contractor completed installation of underground storm drainage main this week and will complete any remaining underground drainage installations when the full roadway reconstruction begins in the coming weeks.

Note that materials and equipment are stored along the project route in the right-of-way. To ensure everyone's safety, all persons, including adults and children, must avoid material stockpiles and equipment. Please contact me at the number listed below if you have any questions and thank you for your patience and understanding.

The Erie County Division of Sewerage Management has notified the Village of the following work activities:

Cured in place pipe (CIPP) lining of the underground sanitary sewers will continue during the week of Monday, March 23rd and will be performed by United Survey Inc. (a contractor of Erie County Sewers). Typical work hours are approximately 7 AM to 7 PM. Vehicles and equipment will be in the roadway during the work. The work involves bypass pumping, and rubber layflat hose will be laid across the roadway during the work. It is OK to drive over the hose with your car. Note that work will involve lane closures.

The tentative schedule for next week is:

Monday 3/23: Between 188 Oakwood and South Willow

Tuesday 3/24: Oakwood between Center and Walnut

Wednesday 3/25: Oakwood between Center and South Willow

Thursday 3/26: Oakwood between Center and South Willow
