

Oakwood Project Update – March 3, 2020

Beginning mid-day tomorrow (March 4th), the Village contractor Nova will be installing drainage pipe crossing the intersection of Center Street on Oakwood.

One lane of traffic will be maintained with flagmen directing traffic.

Work will continue through the afternoon and may be completed by the end of the workday tomorrow. If not completed then, work will continue on Thursday until completed.

It is strongly recommended that while this work is being performed, that motorists avoid this area, if possible, using alternate routes.
